

SEVEN

RAIN (from the Seven album)

Just take a look around you tell me what you see
Where is the love to found the way there needs to be
I've got the solution, the secret's found within us
One life paid our way to free us from our sin

Here's what we need,
A shower from above
Here's what we need,
Rain on us with your love

Rain down Your love
And shine on me
With Heavenly light
Be alive in me

What's all the worry about
Some day it will all pass by
We've got to stand on the promise
That things are gonna be alright

I've got the answer,
Just keep on looking up
You'll see at the end of your rainbow
That it's not gold it's love
